

Netramedia offer a portfolio of flexible solutions for web hosting, domain name registration, application hosting for e-commerce and a powerful range of shared and dedicated server products operating both Windows and Linux environments.

### **Windows 2000 web-servers**

We use only the latest Intel Windows 2000 servers with full support for ASP, Perl, CGI, ISAPI, SHTML and IHTML scripting technologies. We also support the Microsoft FrontPage 2000 extensions.

### **Redhat Linux web-servers**

Our Redhat Linux servers are based on the latest version of Redhat, with Apache web-server and support for Perl and PHP scripting. Full telnet access is provided as standard for domains hosted on our Linux Servers, while FrontPage extensions are available.

### **WIN2K Advanced hosting Solution - £250 per year**

- >> 10 times more resources available to your web-site
- >> Dual Processors Intel Pentium 4 servers  
Hardware RAID facilities
- >> Dual network interfaces (120mb connections)
- >> Gigabyte of memory
- >> Microsoft Windows 2000 server
- >> Very sparsely populated
- >> Mirrored e-mail servers, meaning that there are two different servers assigned to handle e-mail for your domain name. This adds even greater reliability to your e-mail account.

### **Our equivalent Redhat LINUX Advanced Hosting Solution - £250 per year**

### **WIN2K Intermediate hosting solution - £200 per year**

- >> 5 times more resources available to your web site
- >> Dual Processors Intel Pentium 4 servers
- >> Hardware RAID facilities
- >> Dual network interfaces
- >> Gigabyte of memory
- >> Microsoft Windows 2000 server
- >> Sparsely populated

### **Our equivalent Redhat LINUX Intermediate hosting solution - £200 per year**

### **WIN2K Basic hosting solutions - £150 per year**

- >> Dual Pentium Xeon or Pentium III processors
- >> Minimum of 512MB of memory
- >> Hot swappable SCSIII hard drives.
- >> IBM filer systems ensuring your data is safe and always available.
- >> Intel ISP2150 servers, engineered specifically for Internet Service providers.
- >> These servers provide high performance and high availability with integrated management and monitoring systems.

### **Our equivalent Redhat LINUX Basic hosting solutions - £150 per year**

### **SQL SERVER professional data - £500 per year**

Microsoft SQL Server 7.0 Databases MSSQL Server is the most powerful database available for the web today.

### **MY SQL professional data servers - £200 per year**

MYSQL is the open-source standard for databases and is ideal for web applications based on our Linux Servers.

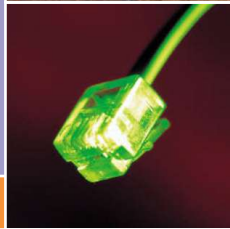

### **Corporate email protection - £100 per year**

Netramedia offers automatic virus scanning of all e-mail messages sent to websites hosted on our systems. The scanning is done at the network gateway level and is seamless to users. If a user should receive a message containing a virus, they are simply sent a generic notification and the message is placed in a quarantine area for inspection later.

### **Other Hosting Services:**

- CASCADE streaming media solutions
- >> STATS! Bandwidth and Live Access Statistics
- >> SSL Secure Server functionality
