

Other Options and Services

COMPREHENSIVE HOSTING THAT WILL ACCOMMODATE ALL POSSIBLE BUSINESS NEEDS

Sub domains

An unlimited amount of sub domains can be created on your account such as subdomain.mydomain.co.uk. By doing this you effectively get multiple websites from a single domain and at no extra cost. For example you could have support.mydomain.co.uk, and shop.mydomain.co.uk, in addition to the standard www.mydomain.co.uk.

Site Builder

Our Site Builder allows the creation of an attractive and compelling website. You can choose from thousands of templates and designs and then simply point and click to create your site. With Site Builder, many stunning websites can be created in minutes with no technical knowledge required. For the more experienced users out there, there are advanced editing options.

.NET Framework

We provide full support for the .NET Framework. The .NET Framework can be instantly enabled on any of your domains.

Matrix Stats

Matrix Stats, the premier web-based statistics service allows you to view both real-time and historical information about the visitors to your website.

FrontPage 2002 Extensions

We currently offer full support for Microsoft FrontPage 2002 extensions which can be installed on any of your domains.

SSL secure server functionality

We can install SSL and allow secure transactions between your web site and your customers.

Microsoft Media streaming

As web technology continues to evolve, your customers' aspirations will increase in proportion to what they want to achieve online, especially in the area of video and audio. Media Streaming is therefore another enhanced feature you can make available to keep them up to date and in turn secure your continuing business relationship.

Basic & Advanced Password Protection

Security is a key issue and with this function you can password protect areas of your website and authenticate users from a text file or any ODBC database. This can be simply achieved without any scripting and is controlled by the server to give a high security and a professional image to visitors. The basic service allows you to validate users from a text file, while the advanced service allows users to be authenticated from a database. This service can be installed on any of your domain names.

Unlimited FTP accounts

Every domain name hosted with us can have its own FTP account which can be used to upload the files for that domain. You will also be issued with a master FTP account that has access to all of your domains. We can also create custom FTP accounts that have access to multiple domain names.
