

Mobile Device Solutions

YOUR MESSAGE AT THEIR FINGERTIPS

Netramedia provides a range of innovative wireless device solutions, using a range of mobile technologies, including Windows Mobile software-based Pocket PC and Smartphone.

Like no other mobile phone, the Windows-powered Smartphone software gives you the ability to communicate via voice and text and access the information you need when you need it.

Mobile devices represent the fastest changing technology on the market and are rapidly becoming more versatile and powerful.

Today's mobile devices are capable of browsing the Web, sending and receiving emails, and displaying a range of multimedia content.

Mobile users will soon utilise their mobile devices to pay for goods and services (even donations) using m-commerce and micro payment solutions. This represents a sizeable opportunity for many businesses both large and small.

Why not contact Netramedia today to learn more about the potential of mobile solutions within your business? Possible solutions include:

- ▣ Mobile Presentations (Both Interactive and Rolling).
- ▣ Websites and Web Services for Mobile Devices.
- ▣ Mobile Applications.
- ▣ Mobile Advertising and Marketing.
- ▣ SMS Solutions.
